

HACK THE 6IX

SPONSORSHIP PACKAGE 2021

August 20-22, 2021 | Virtual Event

Meet the Hack the 6ix 2021 team!

Building the Future

Hack the 6ix is the largest student-run, non-for-profit summer hackathon located in the heart of Toronto.

Every year, we select 500+ participants from a pool of over 1700 remarkable developers, designers, and innovators. Now in its seventh iteration, Hack the 6ix has established itself as a key player in the Toronto tech ecosystem and provides a platform for students to present their ideas of the future. In 2020, we organized an extremely well attended and well received virtual event with 90+ projects submitted over the weekend. Join us from Aug 20-22 for 48 hours of fully remote and fun-filled hacking!

Presenting a Digital Hackathon

Hack the 6ix is monitoring the situation with the current COVID-19 pandemic and our organizing team is committed to evolving the event into a digital hackathon. We want to follow up from a very successful 2020 event to provide valuable experiences and challenges to hackers as well as an opportunity for sponsors to get involved with students in a different format. Hack the 6ix will utilize all available resources to make sure that the event can run smoothly while everyone is socially distancing in their own homes.

Vision

As a hackathon organized by students from universities across Canada, we hope to bring together the nation's talent by providing an interactive environment where attendees can be free to innovate and create under the guidance of our industry mentors. We aim to continue to successfully expand our organization to provide more learning opportunities for students as well as more corporate exposure for companies.

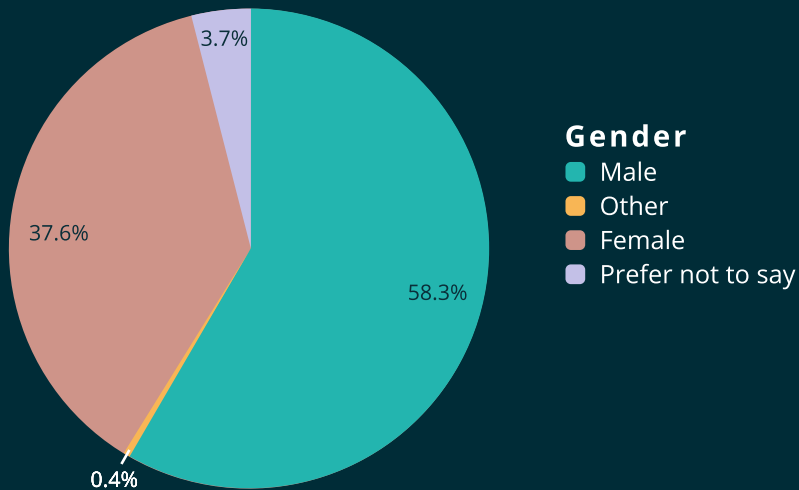

Commitment to Diversity

Hack the 6ix is committed to being an advocate for diversity by creating an inclusive and equitable environment for innovation. In 2020 we took strides towards empowering more participation of women in technology through keynote speakers, panels with company representatives, workshops, and networking sessions. We want to continue with the same energy and hope to inspire more young women and underrepresented groups to explore careers in the technology sector and help them achieve their full potential. Additionally, having a completely remote event has helped break down physical barriers allowing us to host attendees from four continents!
